

Myriad Vision 150SD

With Myriad Document Cameras you can make a strong impact on your audience, adding visual content to enhance your presentation by showing your content on a larger scale - in fine detail.

Utilise the MV 150SD's features to compare work, analyse content and show objects in greater detail. The zoom enlarges source materials, pictures and 3D objects without having to force your audience to move for a better view.

A key use for Document Cameras is to bring student work into lessons for peer led assessment, show and tell and discussion through collaboration.

Myriad's Document Cameras integrate seamlessly with our SPARK II lesson software, enabling teachers to demonstrate and interact with students in real-time; which allows teachers to create lessons that are infinitely more engaging. Alternatively, connect your visualiser to a PC and use Genee Toolbar software to annotate, take stills, zoom and more.

Setting up your Myriad Document Camera couldn't be simpler; plug into a power source, connect the USB cable to your computer/screen, launch the software and you're ready to start your presentation.

Key Features & Benefits

Rotation

Head rotates horizontally or vertically by 180° giving you a wide viewing angle.

Focus

The Myriad Vision 150SD has both auto and manual focus to give you full control.

Simple Connectivity

Setting up your Myriad Document Camera couldn't be simpler; plug into a power source and connect the USB

Seamless Integration

A Genee visualiser seamlessly integrates with your touchscreen or video conferencing system.

Zoom

The Myriad Vision 150SD has a 8x optical zoom and 10x digital zoom for seeing the details.

Peer to Peer Review

Using the Myriad Vision 150SD visualiser enables you to assess and review work in front of the whole class.
